

Model CBF direct drive transfer fans are ideal for ventilating equipment rooms, plumbing & electrical chases or nearly any confined space. The compact design and maintenance free motors provide an economic solution to small ventilating challenges. The efficient propeller and venturi result in quiet operation.

- Mountable in any wall construction
- Fits in place of a standard 16 by 8 inch cinder block
- Performance to 540 CFM and up to 0.4 in. wg
- Available in supply or exhaust configuration
- Mounting flanges for easy installation
