

Vari-Flow Gemini

Bathroom exhaust with EC motor

The Gemini line has a complete offering of EC motors adding efficiency and controllability.

Performance Data:

Standard Features:

- EC motors by themselves are more efficient than PSC motors. When paired with Vari-Flow controls, they provide demand-based control offering the maximum energy savings.
- The Vari-Flow controls offering include temperature, humidity, CO2, VOC, 2-speed and pressure control.

VariFlow EC motor and control options:

Gemini Vari-Flow blends ultra-efficient EC motors and application-specific controllers to create energy savings for demand-based ventilation systems.

GCVF 100 - 180*

*Vari-Flow Controls not available with GCVF 100

GCVF 300 - 700

GCVF 900

Controls

The same superior airflow and sound performance in an even more energy efficient package!

2 Speed Controller

Air Balance Kit

Universal Controller
Temp/RH/VOC/CO₂

Remote Speed
Controller

Pressure Controller

Typical controls applications for Gemini are:

- Two-speed control based on motion or occupancy sensing
- Two-speed control based on time schedule
- Humidity/Temperature control
- Manual remote speed control
